Bio: Dr. Yvonne Sininger, Professor Emerita of Surgery at University of California, Los Angeles (UCLA), is a consultant on hearing research in Santa Fe, NM. She has a PhD from University of California, San Francisco (UCSF), post-doctoral fellowship in Electrophysiology with Manuel Don, PhD, at the House Ear Institute (HEI), and, later became Director of HEI’s Children’s Center before moving to UCLA. Her research has focused on infant hearing and pediatric audiologic disorders.

Abstract: This session will explore information on the development and advantages of Chirp stimuli for electrophysiologic assessments of pediatric patients. Response detection routines and online measures of noise for ABR and significant improvements in response detection for ASSR will also be discussed. Focus will be on improvement of accuracy and reduction in assessment time.

Yvonne Sininger, PhD  
New Technology for  
Electrophysiologic Assessment of  
Infants and Toddlers  
**ABA Tier 1 Credit**

I, Yvonne Sininger, have the following financially relevant relationships in the service and/or product communicated, compared, evaluated and/or reviewed in this presentation. I, Yvonne Sininger, am a paid consultant to InterAcoustics for presentations, have a grant from Oticon Foundation to study IA ASSR and ABR with Chirps, and received no profit from equipment sales. I also was given an honorarium and reimbursements by Interacoustics for this program. I do not have any existing and relevant non-financial relationships.

Jane Madell, AuD  
Counseling Families: Helping Families Accept Technology

I, Jane Madell, have the following financially relevant relationships in the service and/or product communicated, compared, evaluated, and/or reviewed in this presentation. I was given an honorarium and reimbursements by Illinois Academy of Audiology. I do not have any existing and relevant non-financial relationships.

Andrea Hedley-Williams, AuD  
Audiological Implications of Imaging Results in Cochlear Implant Recipients

I, Andrea Hedley-Williams, have the following financially relevant relationships in the service and/or product communicated, compared, evaluated, and/or reviewed in this presentation. I was given an honorarium and reimbursements by Illinois Academy of Audiology and I am board member of Med El Audiology Advisory Board. I do not have any existing and relevant non-financial relationships.
